

Love that Smile

We know you adore your little one's grin — help them keep that smile fresh and healthy with Oral7!

The most beautiful thing in nature is a child's happy smile. So, you'll want to start your children with good oral-hygiene habits from an early age.

Nature's best defence against harmful germs in a baby's first years comes from the natural enzymes of a mother's breastmilk. Oral7 Tiny Teeth Gel contains the two most-protective enzymes found in breastmilk and healthy saliva. These enzymes offer natural protection against germs that can cause decay in delicate baby teeth. Oral7 Tiny Teeth Gel is specific to infants up to the age of 3 and has a completely ingestible, non-foaming formula that has no harmful preservatives, artificial colours or flavours, nor any saccharin or fluoride. With its natural green-apple flavour, it is the only one of its kind!

Also try the Oral7 finger brush, which is made of soft vinyl and does not contain any BPA! It fits over most index fingers, so you can give your baby a lovely gum massage. If they are starting to teeth, it

can be refrigerated and used as a gum soother! For use up till age 3.

For older kids from 4 years and up, get them started early with a simple toothbrushing routine. Get a soft-bristled children's toothbrush and show your child how to brush using Oral7 KIDS Toothpaste. Based on international guidelines recognised by paediatric dentists, it contains natural enzymes and delivers 1,000ppm fluoride — what your child needs to help build stronger enamel for a brighter smile.

And if your children want you to join in the fun at bedtime, you can — with Oral7's adult range of toothpaste, mouthwash and mouth gel! Just check if Oral7 is available at your doctor's clinic, hospital retail pharmacies and other leading pharmacies, Guardian, Kiddy Palace, Nishino, VitaKids and Mom Essentials!
